

FOR IMMEDIATE RELEASE

Telindus Becomes Pan-European Reseller of GoBackTV

Utrecht, Netherlands and Menlo Park, CA, April 25, 2006 - Telindus, the Integrator and leading ICT service and solution provider, and GoBackTV, the fast-growing supplier of next-generation digital video services solutions, today announced they have signed a pan-European reseller agreement. Under the terms of the agreement, Telindus will market and integrate GoBackTV's RetroVue™ platform. The suite is offered through the Telindus office in The Netherlands.

The GoBackTV RetroVue platform is a suite of headend/central-office equipment designed to support digital stream-based broadcast, multicast, and unicast interactive television services. The platform enables DSL and cable operators to go beyond ordinary digital television and VoD, to offer next-generation personalized television services. One key service is time shifting: viewers can pause and rewind live TV, or even jump back to the beginning of a show with the click of a button. Other functionalities include network PVR, custom channels and playlists, and advanced advertising.

As Europe's leading Integrator, Telindus is at the forefront of deployments of cutting-edge IPTV implementations. Now, through its partnership with GoBackTV, Telindus can also offer an innovative, adaptable, multi-purpose television platform, supported by Telindus's top-quality consulting, integration, and management services.

"GoBackTV delivers a flexible, open, stream-based video solution that enables service providers to offer their subscribers personalized television at dramatically lower costs than today's equipment", said Gaby Lips, Vice President at Telindus. "GoBackTV's RetroVue system not only provides the platform for next-generation television, but also enables a smooth transition from today's broadcast services to the advanced, competitive, revenue-generating services of the future", he added.

"This agreement with Telindus marks a significant milestone for GoBackTV as we build momentum in Europe", said Rei Brockett, VP Marketing at GoBackTV. "Telindus has a reputation for consistently picking winning technology solutions for its cable and telco clients. It's a good endorsement for us, and reflects the growing commercial traction of our RetroVue personal TV platform."

About Telindus

Telindus is a group of companies offering ICT Solutions and Services. Telindus serves business and public market needs as a solution and sourcing partner, delivering secured converged networking, and secured systems & applications underpinned by management and support services.

With over 36 years experience in ICT, Telindus is investing considerably in expertise to service modern IT and telecommunications infrastructures throughout their life cycle. Telindus' enviable track record and longstanding partnerships with leading equipment suppliers offers a safe route for enterprises, telecom operators and government bodies looking to deploy long-lasting ICT solutions.

In January 2006, Telindus joined the Belgacom Group to become the IT Services Branch of a new business leader in the market. **Belgacom SA/NV** [Euronext Brussels:BELG] is the leading telecommunications company in Belgium and a market leader in a number of areas, including retail and wholesale fixed-line telephony services, mobile communications services, broadband data and Internet services. Together, Belgacom and Telindus are building a Belgian champion in the European IT landscape, presenting the market a unique offering, uniting Connectivity and IT Services. www.belgacom.be

Telindus posted a turnover of EUR 618 million in 2005. With a highly skilled international team of 2,600 employees, Telindus is present in 13 countries in Western Europe, Hungary, China and Thailand. Telindus is headquartered in Belgium. www.telindus.com

About GoBackTV

GoBackTV delivers the tools that television service operators need to rapidly introduce, quickly scale, and efficiently support the migration to digital television and a revolutionary new generation of video services. GoBackTV's RetroVue™ suite of products enables cable operators and DSL service providers to cost-effectively provide an individual, two-way channel to every television set, and support a wealth of stream-based personal-TV applications, including switched broadcast, time shifting, VoD, iTV, IPTV, and targeted advertising. GoBackTV is a privately held company and is headquartered in Menlo Park, CA. (<http://www.gobacktv.com>)
